EDUCATION

- ❖ SRM Valliammai Engineering College, Chengalpattu   TamilNadu, India
  Bachelor of Technology – Artificial Intelligence And Data Science; CGPA:8.66/10.0   October 2020-May 2024

- ❖ Springfield Matriculation Hr. Sec. School, Chennai   TamilNadu, India
  HSC; Percentage:79.16   May 2020

- ❖ Melmaruvathur Adhiparasakthi High School, Kanchipuram   TamilNadu, India
  SSLC; percentage:83.4   May2018

SKILLS

- ❖ TECHNICAL SKILLS - ReactJS, NodeJS, ExpressJS, MongoDB, Python, Flask Machine Learning, Deep Learning.
- ❖ SOFT SKILLS   - Team work, Adaptability, Creativity, Time Management.

EXPERIENCE

- ❖ Full Stack Developer – Freelance   October 2021- September 2023
  PeoplePerHour   Remote
    - Freelancer at PeoplePerHour with a rating of 4.5/5.
    - Worked on more than 10+ live project.
    - Recently worked on a project called MYREKLAM, With this other company can able to post their job
       and recruit people.
       Tech: ReactJS, NodeJS, ExpressJS, MongoDB, RestAPI's, GMap Integration.

- ❖ Machine Learning Engineer – Intern   June 2023 - July 2023
  Anyware Labs,   Chennai, TamilNadu, India
    - Resume Job Description Analyzer - performed Optical Character Recognition (OCR) on the resume
       and extracted the text for Namedentity recognition (NER), Vectorization to get the percentage by
       performing cosine similarity.
       Tech: Python, Pytesseract, Spacy, Sklearn, NLTK, Streamlit, BERT- SentenceTransformer
    - Table Extractor From Image - Extracted the data from the image using ocr method and did multiple
       preprocessing steps to return data as data frame
       Tech: Pytesseract, Pandas, OpenCV, Numpy.

- ❖ MERN Stack Developer – Intern   July 2021- September2021
  Devtown   Remote
    - Build many web applications with responsiveness, better functionality, and good user experience
       and deployed them in the cloud
    - Food Delivery web application - fully working application with functionality like ordering, rating,
       and Authentication.
       Tech: ReactJS, NodeJS, ExpressJS, MongoDB, RestAPI's, Tailwind CSS.

PROJECTS

- ❖ **Food Delivery Application** (ReactJS,NodeJS,ExpressJS,TailwindCSS,MongoDB) : fully working application with
  functionality like ordering, rating, commenting and authentication.

- ❖ **Event Website** (NextJS ,TailwindCSS,MongoDB): fully working full stack web application with functionality like
  registration, mailing after registration, QR generator, QR Scanner with dashboard for admin with google
  authentication.

- ❖ **Website Clones** (ReactJS): Created clones resembling popular platforms like Netflix, BookMyShow, and YouTube
  utilizing ReactJS.

- ❖ **Job Description Similarity Predictor** (NLTK, OCR, NER, Streamlit): A model which is connected with
  the frontend built with streamlit, which takes resume and job description as input and makes all analyses(OCR, NER,
  Cosine similarity)and returns the similarity in percentage.
